

## CASE STUDY

JOHNSON  
WINTER &  
SLATTERY

[jws.com.au](http://jws.com.au)

### A LEADING LEGAL FIRM ACHIEVES TRUE CYBER RESILIENCE AND READINESS TO RESPOND TO CYBER THREATS

Johnson Winter & Slattery is an independent national Australian law firm with over 60 partners and offices across Australia. Johnson Winter & Slattery is engaged by major businesses, investment funds and government agencies as legal counsel on important transactions and disputes throughout Australia and surrounding regions. Johnson Winter & Slattery helps their clients to navigate legal complexity in both commercial transactions and dispute resolution by applying specialist legal expertise, innovative technology and commercial awareness to our clients' business objectives.

Being a leading legal firm in the region, Johnson Winter & Slattery deals with significant amount of confidential and sensitive information, having many high profile customers on their portfolio. Johnson Winter & Slattery are well aware of cyber risks and were seeking for an end-to-end solution providing ongoing assurance and defence against the most sophisticated cyber threats

*“Effective decision making is driven by the strength of the information available. Out of the box connectors and dashboards allowed us to move from implementation to action in minutes. Combining ThreatDefence’s capability with their proactive management service and regular posture reviews places us in a strong position of readiness. “*

**Ross Forgione, CIO, Johnson Winter & Slattery**

Johnson Winter & Slattery have been using ThreatDefence to identify security risks non only in their security posture, but also in the security of their customers and partners. Threat Defence’s cyber risk protection provided real-time assessment of third-party organisations, identifying risks early even when they are completely outside of control the organisation.

Johnson Winter & Slattery understand the important to be ready to incidents, and have been using ThreatDefence on the ongoing basis to prevent numerous attempts to compromise their systems or data. The provided service is supported by ThreatDefence’s regular threat hunting sessions which provide additional
